SOCKET MECHANIX

MILLWRIGHT & ROTATING EQUIPMENT SERVICES

MILLWRIGHT & ROTATING EQUIPMENT SERVICES

BUILT FOR THE RESTART.

Precision in the work. Confidence in the restart.

2027 LAUNCH PREVIEW / PLANNED CAPABILITIES

Socket Mechanix is preparing to launch with precision millwright and rotating equipment services for refineries, chemical plants, power generation, gas processing and heavy industry.

Pumps & seals

Centrifugal pump rebuilds and mechanical seal change-outs for process and utility service.

Compressors & gearboxes

Mechanical overhaul support for compressors, bearings and gearboxes.

Precision alignment

Laser alignment, soft-foot checks and thermal growth considerations, with final results recorded.

Turbine outages

Steam and gas turbine mechanical support: casings, bearings, seals, clearances and reassembly.

Machinery installation

Setting, leveling and grouting machinery and skids for capital projects.

Fin fans & drivers

Fan, hub, motor and drive rebuilds, with vibration checks as defined in the work scope.

THE SOCKET STANDARD / PROPOSED HANDOVER FRAMEWORK

01 **As found**

Condition, relevant findings and measurements before work begins.

02 **Work performed**

Agreed work, parts and documented scope changes.

03 **As left**

Final readings against agreed equipment requirements.

04 **Next actions**

Outstanding items, follow-up needs and handover responsibilities.

Start the conversation.

Share the equipment, location, work scope, target outage window and site requirements. Coverage and availability confirmed directly.
